- # of Baffles: **9**
- Laser-welded baffles for enhanced durability
- Interchangeable end caps
- **MAP: $799.99**

FITMENT & INCLUDED ACCESSORIES

All Vigilant Arms suppressors include a direct mount hub. The Jay screws directly to barrels threaded ½”×28. The Crow, Raven, and Raven L will screw onto barrels threaded ⅝”×24, although the hub can be interchanged with any hub using the industry standard 1⅜”×24 pattern.

Jay suppressors include a takedown tool for easy cleaning, and have a takedown tool integrated into the hub.

Crow, Raven, and Raven L suppressors include a flat end cap, for maximum sound suppression, and a muzzle brake end cap, for maximum recoil reduction.

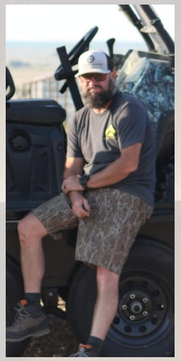

WELCOME TO THE WATCH

Thank you for your interest in our line of suppressors. We at Vigilant Arms pride ourselves on our expectation of excellent quality, our attention to detail, and our customer service. We strive to deliver to our customers a product that performs well on both the range and in the field. If they fail to perform, our suppressors are backed by a lifetime warranty, and we will gladly work with you to meet your needs.

If you have any questions about our suppressors, about selecting a suppressor, or about servicing your suppressor please feel free to call our store at *(270) 917–1577*, or email us at *vigilantarmsandoutfitters@gmail.com*.

Thank You,

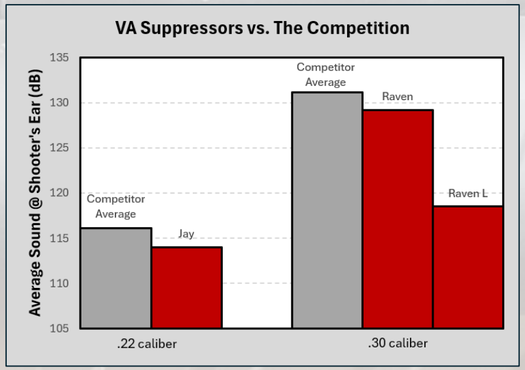

Ryan Vanover- Owner

WHY BE VIGILANT?

All of us here at Vigilant Arms got together all of the suppressors from other makers that we could buy, borrow, or beg. We then rented a fancy sound meter, and tested all these suppressors, comparing them to the ones we make.

Here’s what we got:

Measured using a Larson Davis 821IH-QPR sound level meter. .22 caliber suppressors tested with .22lr, 45 gr. subsonic bullets. .30 caliber tested with .300blk, 220gr. subsonic bullets. Test guns were bolt actions with 16” barrels.

So, not only are Vigilant Arms suppressors lighter for the money, but they’re top of the line in sound suppression.
